● 1/6

The screenshot displays the Remix IDE interface. On the left, a dark sidebar contains icons for various functions. The main area is split into two panels. The left panel shows a tutorial slide titled "Intro to the Interface" with the heading "Remix is composed of four panels." Below this, a diagram labels four panels: Icon Panel, Side Panel, Main Panel, and Terminal. A bulleted list explains their functions: plugins appear in the Side Panel; code editing occurs in the Main Panel; transaction results are visible in the Terminal; and switching between plugins happens in the Icons Panel. The right panel shows the Remix IDE's main workspace with the title "REMIX" and the tagline "The Native IDE for Web3 Development." It includes links to Website, Documentation, Remix Plugin, and Remix Desktop, a search bar for documentation, and buttons for "Start Coding", "Open File", and "Access File System". Below these are sections for "Recent workspaces" (listing tb - blockchain, default_workspace, and Playground) and "Load from" (with buttons for GitHub, Gist, IPFS, and HTTPS). At the bottom, there's a transaction monitor showing 0 transactions and a search bar for transaction hashes.
